AIR TOOLS

SHOP EQUIPMENT HAND TOOLS UNDERCAR KIT HYDRAULICS

A SECONDARY HANDLE

which can be installed in either the vertical or horizontal positions adds stability to help keep the tool oriented in the proper position.

DESIGN ALLOWS TOOL TO MANEUVER AROUND INNER AND OUTER CURVES

as well as most body design features.

FORGED AND HARDENED STEEL DE-CRIMPING HEAD

is specially designed to un-fold the steel flanges of a damaged door skin with a minimum of physical effort.

Model	Body Material	Included
DS2000	Aluminum	#9480 Door Skin Starter Pliers

- Precision machined aluminum body components, hardened shafts, and ball bearing construction throughout, for long life and maximum durability to provide many years of trouble free service for real world professional use.
- The DS20000 is manufactured to be very versatile with provisions to reposition the un-crimping head to various angles based on operator preference.
- Powerful pneumatic drive motor with planetary gear reduction reduces the speed and allows for maximum range of motion of the un-crimping head.
- Close tolerance design and manufacturing, results in a tool that is incredibly smooth, and easy to use.
- Come with 9480 Door skin starter Pliers.
